## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Response to Amendment***

Applicant's amendment dated 12/31/2002 has been received and entered.

Applicant's arguments dated 12/31/2002 have been considered but are moot in view of the new grounds of rejection as follow:

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 4-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Broer et al., US Patent No. 5,808,713.

Art Unit: 2871

The above claimed are anticipated by Broer et al. figure 2 which discloses an unified optical element comprising a polarization separating sheet member as claimed (31), a prismatic light control face (34) being one surface of the polarization film itself.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-2, 7 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hiyama et al., US Patent No. 6,104,454.

Regarding the above claims, Hiyama et al. disclose a liquid crystal display (LCD) device (figure 12) comprising:

a liquid crystal panel (250) having a liquid crystal layer (251);

a polarizing film (252);

a prismatic light control (240);

a light source device (220 and 230);

Although Hiyama et al. do not disclose the prismatic light control element being formed directly on the polarization film, it would have been obvious to one skilled in the art at the time of the invention was made to form a prismatic light control element directly on the polarization film,

Art Unit: 2871

since it has been held that forming in one piece an article which has formerly been formed in two pieces and put together involves only routine skill in the art. *Howard v. Detroit Stove Works*, 150 US 164 (1893).

5. Claims 3 , 8 and 10 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Hiyama et al., US Patent No. 6,104,454, in view of Applicant's admitted prior art (APA).

Regarding the above claims, the modification to the Hiyama et al. device disclose the claimed invention as described above except for a light scattering pattern providing on an emission face of the guide plate, and a distance between the light guide and prism. It would have been obvious to one of ordinary skill in the art to provide a light scattering pattern providing on an emission face of the guide plate as well as the distance between the surface light source device and the projection rows of the prismatic element being in the range of 0.5 to 5 (mm) as shown in APA (figure 2) since it is a common practice in the art to promote light from a guide plate to a liquid crystal display panel.

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 2871

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
